PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in Java, Python, SQL, Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Hands-on experience in software development through internships and academic projects, with knowledge of web technologies and application development. Strong problem-solving and debugging skills with a willingness to learn new technologies and contribute effectively to software development and IT projects.

EDUCATION

Stanley College of Engineering and Technology for Women

Bachelor of Engineering in Computer Science and Engineering (CGPA: 8.0/10)

Hyderabad, India

Aug 2024 – Present

KDR Govt Polytechnic College

Diploma in Computer Engineering (CGPA: 9.02/10)

Wanaparthi, India

Aug 2021 – May 2024

Kakatiya Model High School

Secondary School Certificate (CGPA: 10.0/10)

Mahaboobnagar, India

Mar 2020 – Mar 2021

TECHNICAL SKILLS

Languages Java, Python, SQL, JavaScript, HTML, CSS

Core CS Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Development Flask, FastAPI, React.js, REST APIs

Databases MySQL, SQLite

AI/ML NLP, Speech Recognition, Vosk, Ollama

INTERNSHIP EXPERIENCE

Superchat, Inc.

Software Engineering Intern

Hyderabad, India

Apr 2026 – Jun 2026

- Developed an offline Voice Chat Assistant using Python, Flask, Vosk, and Ollama.
- Integrated speech recognition, response generation, and text-to-speech components for application-level voice interaction.
- Developed frontend components using HTML, CSS, and JavaScript and integrated them with backend services.
- Performed debugging, error handling, application testing, and frontend-backend integration during development.

Student Tribe (Colosseum CQ Solutions Pvt. Ltd.)

AI Image Annotation Intern

Hyderabad, India

Mar 2026

- Annotated and categorized image datasets used for computer vision and machine learning applications.
- Performed accurate bounding box, semantic, and keypoint annotations following defined dataset requirements.

PROJECTS

ScholarAI – Scholarship Management System

React.js, FastAPI, Python, SQLite

- Developed a web-based scholarship management system for student registration, scholarship discovery, eligibility checking, and application management.
- Implemented REST APIs using FastAPI and integrated the backend with a SQLite database.
- Developed authentication functionality including protected routes and OTP verification.
- Implemented eligibility and recommendation logic using student academic and profile data.
- Tested application workflows and debugged frontend-backend integration issues.

Offline Voice Chat Assistant

Python, Flask, Vosk, Ollama, HTML, CSS, JavaScript

- Built a local voice-based assistant capable of speech recognition and AI-generated responses without relying on external APIs.
- Integrated Flask backend services with speech recognition and text-to-speech components.
- Implemented a web interface for microphone interaction, chat responses, and application status.

CERTIFICATIONS

- Java Programming – Scaler**
- Python for Beginners – Udemy**
- Introduction to Machine Learning – Cognitive Class**
- Automata Theory – Mind Luster**
